13

PITTSBURGH, Nov. 3, 2011 -- Ascent Data announced today, the launch of Ascent DataGuard, a new Encryption as a Service (EaaS) data security solution. Powered by TrustNet Manager from Certes Networks, Ascent DataGuard is a web-based management platform that provides encryption of data-in-motion as it travels across wide area networks and cloud infrastructures.

Ascent DataGuard provides a fast and cost-effective option for companies looking to secure data in motion, especially those looking to adopt cloud networking through public or private cloud migrations. Available as a standalone solution, or as part of Ascent2Cloud for cloud computing or Ascent DataColo for colocation, Ascent DataGuard protects data on the network without impacting existing network performance or service levels, and without capital expenditures.

"Through our SAS 70 Type II data center solutions, and our partnership with Certes Networks as the region's first provider of multi-layer EaaS, we deliver all the benefits of the industry's leading network security, while mitigating the costs associated with distribution, deployment, and ongoing upgrades and maintenance of corporate-owned assets," said Steve Shangold, CEO at Ascent Data.

Ascent DataGuard eliminates all of the tradeoffs that have traditionally accompanied network encryption, and allows organizations to follow the best practice of separating security and infrastructure management roles. Certes Networks' innovative policy and key management solution, and multi-layer, wire-speed encryption appliances can secure any network without impacting the underlying infrastructure or application performance.

"We are pleased to offer our encryption solution through Ascent Data who has built a strong reputation as a trusted data center service provider," said Thomas Gill, CEO of Certes Networks. "The Ascent DataGuard

managed security service provides a cost-effective means for complying with data security regulations and implementing security best practices."

Shangold added, "Ascent DataGuard simplifies security management while preserving network performance and functionality. Our customers are able to secure networks and achieve regulatory compliance, whether they are subject to PCI DSS, HIPAA, HITECH, NERC CIP Standards, Sarbanes-Oxley or any data privacy/protection mandate. Ascent DataGuard reduces the cost of deploying, managing and maintaining encryption without impacting applications or infrastructure."

**A Star is Born: Canon Launches New Digital Cinema Camera for High-Resolution Motion Picture Production** (2011-11-04 00:37)

Canon Inc. and Canon U.S.A., Inc. today raised the curtain on an all-new interchangeable-lens digital cinema camera that combines exceptional imaging performance with outstanding mobility and expandability to meet the demanding production needs of today's motion picture industry. The camera, which features a newly developed Super 35 mm-equivalent approximately 8.29-megapixel CMOS sensor, will be available in two models: the EOS C300 Digital Cinema Camera\*, equipped with an EF lens mount for compatibility with Canon's current diverse lineup of interchangeable EF lenses for EOS single-lens reflex (SLR) cameras and new EF Cinema Lens lineup; and the EOS C300 PL Digital Cinema Camera\*, with a PL lens mount for use with industry-standard PL lenses.

#### • Coming Attractions: New Canon Digital SLR Camera Under Development (2011-11-04 00:37)

Canon Inc. today announced that the company is developing a new-concept EOS-series digital single-lens reflex (SLR) camera.

Incorporating an enhanced version of the video-capture capability offered in the current EOS-series lineup, the new camera will be ideally suited for cinematographic and other digital high-resolution production applications. The model will be equipped with a 35 mm full-frame CMOS sensor and, enabling the recording of 4K video\* (at a frame rate of 24P, with Motion-JPEG compression), will make possible the type of exceptional image quality and sublime imaging expression to be expected from the next generation of "EOS Movies."

#### • Sigirty to Host Free Seminar Series on High-Speed Electronic Design Challenges and Solutions (2011-11-04 00:37)

**Sigirty, Inc.**, the market leader in signal and power integrity solutions, will present a free multi-city series this month on innovative solutions for high-

speed design challenges associated with power integrity, signal integrity and electromagnetic interference (EMI). During the half-day sessions, attendees will hear presentations by Sigirty founder Dr. Jiayuan Fang and other Sigirty technologists highlighting the interrelated nature of these multi-domain effects, and strategies for reducing related design risks. The seminar will focus on tackling issues associated with simultaneous switching output (SSO) and assessing end-to-end high-speed serial links. Participants will have the opportunity to discuss specific user project needs and Sigirty initiatives during a social hour with refreshments at each location. There is no charge to participate in the seminars, but advance registration is required.

#### • Canon Casts EF Cinema Lenses in Starring Role for New Cinema EOS System (2011-11-04 00:37)

Canon Inc. and Canon U.S.A., Inc. today announced the introduction of seven new 4K EF Cinema Lenses, an all-new series of video cinematography lenses that,

in addition to the company's current lineup of interchangeable EF lenses for EOS single-lens reflex (SLR) cameras, form the core of Canon's new Cinema EOS System. The launch of the Cinema EOS System marks Canon's full-fledged entry into the digital high-resolution production industry. The new professional digital cinematography system spans the lens, digital cinema camera and digital SLR camera product categories.

#### • Lights! Camera! Action! Canon Makes Hollywood Debut with Launch of Cinema EOS System (2011-11-04 00:37)

Canon Inc. today announced Canon's full-fledged entry into the motion picture production industry with the launch of the Cinema EOS System. Canon's new professional digital cinematography system spans the lens, digital cinema camera and digital SLR

camera product categories.
